DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of group I, claims 1-13, in the reply filed on 12 January 2006 is acknowledged. Examiner also acknowledges the cancellation of group II, claims 14-22

Allowable Subject Matter

Claims 1-13 are allowable in reference to the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or disclose the invention as a whole nor does it make the invention obvious to a person skilled in the art.

Sakaguchi et al. US 2003/0087503 A1 discloses forming a silicon-on-insulating layer over a substrate and lifting the layers off the substrate.

King et al. US 4,142,925 discloses forming a silicon-on-insulating layer over a substrate with the first surface in contact with the substrate and then lifting the layers off the substrate to expose the second surface of the silicon-on-insulating layer.

However, none of the references of record teach or suggest disposing a first substrate over a image sensing device layer that is formed over the first surface of a silicon-on-insulating layer that is formed over a substrate, lifting off the first substrate, image sensing device layer, and silicon-on-insulating layer from the substrate thereby

exposing a surface of the silicon-on-insulating layer, and forming an optical device array over the exposed second surface of the silicon-on-insulating layer.
